

Virtual Delivery Testing Modifications
Academic Integrity and Test Security Expectations
COVID-19

While providing virtual delivery of course material due to disruption to operations from COVID-19, testing will be conducted online. Instead of completing exams in a physical classroom, students will take all written tests and exams from remote locations.

Academic Integrity and Test Security Expectations

Students will complete their block exams with the same level of professionalism displayed during in person exams. This means trusting the value of your own intellect and not engaging in unauthorized collaboration, cheating or facilitating academic dishonesty in any way. Student Block Exams may be randomly proctored via ExamSoft's ExamMonitor without notice to the student.

Exam Download Expectations

- Students will be notified via their wsu.edu email address when exam downloads are available (typically two days prior to the exam at 1:30pm).
- Students will have until 8:00am the morning of Block Exams to download their exams.
- Failure to download exams by 8:00am the morning of the exam will result in a forfeit of the test attempt.
- Students will then need to sit for the next exam attempt.

Exam Password Process

- Students will receive the Block Exam password 5 minutes before the scheduled start of Block Exams.
- Passwords will be emailed to students via ExamSoft and also posted on the Blackboard Learn course space.
- Students who are late starting their exams will be subject to the CPPS exam testing policy.
- Students are required to start their exams at the scheduled time.
- Testing anomalies will be forwarded to the instructor of record for review.

Any technical issues or questions should be directed to CPPS ITS staff. ITS staff will be available by phone 509-358-7916 and remote support during testing.

CPPS ITS support staff may ask students to run the following application if remote support is required.

- macOS - <https://download.teamviewer.com/download/TeamViewerQS.dmg>
- Windows - <https://download.teamviewer.com/download/TeamViewerQS.exe>
