

# ANNUAL TIMELINE

Below is WSU's general timeline for collecting availability and coordinating specialty rotations for each rotation year. We make every attempt to release scheduling earlier than anticipated, dependent on circumstances.

*Please note:* the timeline may shift due to various factors, especially availability shortages.

**Late Summer/Early Fall:** WSU puts out a request for availability for the upcoming year.

After preceptors/coordinators enter availability in CORE ELMS, WSU reviews and sends a confirmation from CORE ELMS once finalized.

Simultaneously over fall term, WSU coordinates APPE specialty rotations (e.g., international) with students. These are scheduled before general placements.

**Fall term into winter:** The majority of availability must be submitted to determine any shortages, and follow-up with partners.

**January/February:** Students review all partner availability and rank rotation preferences.

**Early March:** After student schedules and change requests are finalized, WSU shares schedules with partner sites, and onboarding begins.
